1 - Open Oculus App, make sure the device is connected and set up properly. Enable "Oculus link" if you are using a Quest/Quest2;

2 - Open "Anaconda Prompt", type:

- conda activate psychxr
- spyder

3 - Run "fold_parallax_v23.py" script, a dialogue will show up on the task bar (flashing orange, click on it):

4 - Put 2 letters in "Name" field;

5 - Vary "Stereo Condition" and "Static Condition" (4 conditions in total).
